Ghana gains access to US\$190 Million after meeting Compact Milestone

Christopher Lamora, Charge d'Affairs and Ag. U.S. Ambassador presenting the letter to the Vice President, H.E. Alhaji Mahamudu Bawumia

Ghana is to receive the second allocation of Compact funds from the Millennium Challenge Corporation (MCC), in the amount of \$190 million U.S. Dollars after the Ghanaian government met all the required conditions to access the funds. MCC submitted a letter acknowledging Ghana's achievement of this milestone to the President, His Excellency Nana Addo Dankwa Akufo-Addo. Upon Entry-Into-Force of the Ghana Power Compact on September 6, 2016, MCC granted access to the first allocation of Compact Funds in the amount of \$308.2 million U.S. Dollars. MCC's investment in the Ghana Power Compact totals \$498.2 U.S. Dollars.

A delegation led by Professor Yaa Ntiamoah-Baidu, Board Chair of MiDA, and Christopher Lamora, Charge d'Affairs and Ag. U.S. Ambassador to Ghana, presented the Acknowledgement Letter to the Vice President, H.E. Mahamudu Bawumia, who received it on behalf of the President.

Speaking at the ceremony, the MiDA Board Chair said: "Today marks a significant milestone in the implementation of the Power Compact Program. With these funds, MiDA together with its implementing entities will be able to carry out the planned investment and reform activities aimed at strengthening our country's power distribution sector".

"Meeting this important milestone is a testament to the commitment of the Ghanaian Government to reform its power sector in an effort to bring critical services to its people," MCC Acting CEO Brock Bierman said. "But much work remains. With only 3 years remaining for the MCC Ghana Power Compact, we must continue to work together until the Concession is complete and the path is paved to inject Private-Sector Investment and expertise to transform the viability of the Ghanaian power sector."

The Vice President acknowledged the notification and thanked the U.S. Government and the MCC for their partnership through the Ghana Power Compact; a manifestation of the strong cooperation that Ghana has with the US. "Today is a great day and we are entitled to celebrate our achievement" he said, "However we have a significant number of project activities to be carried out in order to meet all milestones. I therefore urge all stakeholders to continue to collaborate and maintain the alacrity they have demonstrated so far."

He reiterated Government's commitment to ensuring that the Compact delivers its goal to reduce poverty through economic growth, by transforming the Power Distribution Sector.

H.E. Vice President Bawumia addressing the meeting

Commemoration of 2nd Anniversary of Compact II Entry-Into-Force

GoG and ECG sign PSP Transaction Agreement

The process to introduce Private Sector Participation (PSP) in the electricity distribution business of the Electricity Company of Ghana (ECG) reached a significant milestone with the signing of the Transfer Agreement between the Government of Ghana and Power Distribution Services (PDS) Ltd. The signing, which took place at the Jubilee House in Accra on 3rd July 2018, was witnessed by key Government Officials including H.E. Dr. Mahamudu Bawumia, Vice President of Ghana, Hon. Boakye Agyarko Minister for Energy and Hon. Ken Ofori- Attah Minister for Finance.

In 2014, the Government of Ghana announced the introduction of a PSP in ECG as part of other projects collectively aimed at turning around the financial and operational fortunes of Ghana's largest power distributor under the Ghana Power Compact Programme. A similar intervention is planned for NEDCo, which is Ghana's second larg-

est power distributor serving the northern parts of the country.

PDS Ltd, incorporated in Ghana by a consortium led by Philippines based Meralco is expected to invest a minimum of US\$500 million into the operations of ECG in the first five years of their take over. The company is required to make infrastructure upgrades to ECG's existing networks with the aim of improving, among others, network service quality. Improvements in revenue collection are also expected with the advent of PDS' takeover culminating in a more efficient and credible power distribution off taker over a 20 year period when the Concession Term comes to an end.

Come February 2019 PDS will officially take over the Management of, Operation of, and Investment in the Electricity Distribution Business of ECG.

H.E. Dr. Mahamudu Bawumia
Vice President of Ghana

MiDA Supports NaCCA with Office Equipment to facilitate its work

Mr. Mawunyo Rubson, Director for Generation Projects, has presented office equipment valued at over 84,000 cedis on behalf of MiDA to the National Council for Curriculum Assessment (NaCCA) to facilitate the educational institution's work on the development of Pre-Tertiary Education Curriculum updates on energy efficiency and conservation. Mrs. Felicia Boakye-Yiadom, Acting Executive Secretary of NaCCA, on July 20, received eight laptops and a Multi-Functional Printer on behalf of the Ministry of Education to be used by NaCCA.

The presentation fulfils MiDA's obligation to the Ministry of Education (MoE) to provide it with office equipment for the implementation of Power Compact Programme's activity as is contained in the Implementing Entity Agreement (IEA) signed between the two parties in December 2017. According to the IEA, MiDA and the MoE have agreed to collaborate towards developing an energy efficiency programme to be incorporated in Ghana's Pre-Tertiary Education Curriculum and to conduct experimental public education and outreach activities.

The Power Compact, through the Energy Efficiency and Demand Side Management (EEDSM) Project, is introducing several policy initiatives and programs which are aimed at ensuring energy efficiency and conservation in the use of Ghana's available power capacity. Included in the policy initiative is the introduction of energy efficiency behaviors targeted at pre-tertiary education students. This is being implemented under the EEDSM's Education and Public

Mr. Mawunyo Rubson, Dir. for Generation Projects presenting the Office Equipment to Mrs. Felicia Boakye-Yiadom, Ag. Exec. Sec. of NaCCA left is Mr. Sylvester Ayayee, EEDSM Project Manager

Information Activity which generally seeks to sensitize the Ghanaian public about energy efficiency and conservation through behavioral change. Other activities under the EEDSM Project are:

Development and Enforcement of Standards and Labels Activity. This activity, involving collaboration with the Ghana Standards Authority and the Energy Commission, will develop regulation and enforcement for the use of higher efficiency appliances, aimed at saving overall energy consumption.

Improved Energy Auditing Activity. This will build national capacity in energy auditing through establishing Training Centres and implementing programs for evaluating energy consumption and determining ways to save and conserve energy through investments in Energy Efficiency Retrofits for selected government buildings.

Demand Side Management Infrastructure Activity - involves undertaking a pilot solar program and getting the public to use solar systems for addressing the high lighting loads, as well as installation of energy efficient street lighting to replace existing high energy consuming street lights.

MiDA and ECG Collaborate to Train Trainers for the Implementation of the ECG Environment and Social Management System (ESMS)

A two-day Train the Trainer (TTT) Workshop aimed at providing the knowledge and coaching skills requisite for training ECG Staff on the organization's Environment and Social Management System (ESMS) developed in collaboration with MiDA, has been held at the ECG Training School in Tema. The workshop, collaboratively put together by MCC, MiDA's Environment and Social Performance (ESP) Unit and its ECG counterpart, was organized from September 13 to 14 at the ECG training school in Tema. A total of 31 Trainers nominated from ECG's Sub Transmission, Central, Volta, Eastern, Tema, Western, Ashanti and Accra Region Offices participated in the training. Among its several objectives, the event sought to guide Trainers on how to evaluate their personal training strengths and identify areas for development; it also introduced Trainers to the concept of Adult Learning and how to apply these in training other staff; as well as help trainers recognize the differences between training and presenting information.

As part of the Ghana Power Compact's intervention towards reforming the power distributor into a modern utility company, ECG in collaboration with MiDA developed a robust ESMS to manage Environment, Social, Health

and Safety risks and impacts associated with ECG's operations. Staff training and capacity building is key to the successful implementation of the ECG's ESMS.

A total of 34 training courses including Train the Trainer (TTT), Safety, Health and Environment (SHE) induction, hazard identification & risk assessment, AHA – Activity Hazard Analysis have been identified under the ESMS which, collectively, would equip ECG Staff with the skills to successfully implement the ESMS and ensure that Environment, Social, Health and Safety Management becomes central to ECG's operations.

Laura Casey, MCC Consultant facilitating the training

Pre-Proposal Meeting for Pokuase Bulk Supply Point (BSP)

A cross section of participants

Several local and international firms participated in a Pre-Bid Conference organized on July 26 by MiDA's Procurement Unit as part of processes to identify a suitable Contractor to supply and install a Bulk Supply Point (BSP) and Sub-Transmission Interconnecting Circuits in Pokuase in the Greater Accra Region. Present at the Event were Executive Officers of MiDA, Senior Officials of GRIDCo and Officials of SMEC International PTY Ltd (SMEC), Program Management Consultants for the Compact Programme.

The Pokuase BSP Project Activity is being implemented under the ECG Financial and Operational Turnaround Project's Technical Loss Reduction Activity. The BSP will be the first 330kV Bulk Supply Substation for the ECG Distribution Network. When completed, the Pokuase BSP is expected to ease overloads per the prevailing forecast for electricity demand. It would also avoid rolling brown-outs (a reduction in or restriction on the availability of electrical power in a particular area).

Martin Eson-Benjamin, CEO of MiDA welcomed Participants to the Pre-Bid Conference and thanked them for showing interest in the Project. "The BSP Project is MiDA's flagship Project and should have been completed yesterday" he said. He explained that MiDA was working against time in as far as the Project was concerned, and advised Bidders to make the best out of the process by asking relevant questions for clarifications. He also encouraged the Bidders to consider themselves as potential partners to MiDA.

Abdul Samed Ibrahim, Principal Electrical Engineer at GRIDCo, reiterated the importance of the Pokuase BSP to power transmission and distribution in Ghana. He said that provision for the construction of a BSP in the Pokuase Area had been long envisaged hence the Power Compact's intervention to provide the facility was welcomed. Mr. Ibrahim explained that the BSP would cater for the increased Power Supply Demand in Accra and in some neighbouring towns. He indicated that Power supply quality and reliability to communities near the Substation Site such as Kwabenya, Pokuase, Legon and its environs was expected to improve significantly. Technical losses in the GRIDCo transmission Grid and the ECG distribution network was expected to reduce significantly. This would lead to the improvement in the financial positions of the Power Companies.

There were Presentations on the Legal and Governance Framework of the Compact II Programme by Yvonne Fiadjoe (General Counsel), MiDA's Invoicing and Payment Procedures by John Boakye (Chief Financial Officer), Technical Aspects of the BSP by Eric Asare (Director, Distribution Projects) and the Procurement Process and Invitation for Bids by Frank Mante (Director Procurement), supported by Kwadwo Osei-Asante Senior Procurement Specialist (Charles Kendall and Partners).

As part of the Conference, Participants also took a tour of the BSP Project Site.

Bidders visit the Pokuase BSP Site

MiDA: General Procurement Notice No. 10

The Procurement Program for the Period: 1st Oct 2018 to 31st Sep 2019

Total estimated value US\$ 212,078,038

Status as at 4th December 2018

Procurement of Goods in:	Status
Component 1: ECG Financial And Operational Turnaround (EFOT): Activity 1.5 – Outage Reduction Activity - which include:	
* Procurement of Vehicles for ECG Operations (Bucket Trucks)	Yet to be undertaken
Component 2: NEDCo Financial And Operational Turnaround (NEFOT): Activity 2.2 – Modernization Utility Operations - which include:	
* Procurement of Operations and Maintenance Materials for NEDCo	Yet to be undertaken
* Procurement of Vehicles (Bucket Trucks and 4x4 Pick-up Trucks) for NEDCo Operations	Yet to be undertaken
* Procurement of Tools and Equipment for NEDCo Operations	Yet to be undertaken
* Procurement of Office Equipment, Furniture & Fittings for NEDCo Secretariat	Yet to be undertaken
* Procurement of Vehicles for NEDCo Secretariat	Yet to be undertaken
* Procurement of Office Equipment for Volta River Authority (VRA) Desk	Yet to be undertaken
Component 6: Energy Efficiency & Demand Side Management Project: Activity 6.1 Development And Enforcement of Standards & Labels Activity - which include:	
* Procurement of Field Metering & Monitoring Studies Testing Equipment	Yet to be undertaken
Component 6: Energy Efficiency & Demand Side Management Project: Activity 6.2 Improved Energy Auditing - which include:	
* Procurement of Mobile Test Labs	Yet to be undertaken
Component 6: Energy Efficiency & Demand Side Management Project: Activity 6.4 Demand Side Management Infrastructure Activity - which include:	
* Procurement of Office Equipment for the Ministry of Energy IEA	Evaluation stage
* Procurement of Office Furniture for the Ministry of Energy IEA	Evaluation stage

Component 8: Programme Administration & Oversight: Activity 8.1 - MiDA Administration - which include:

* Vehicle Accessories	Partly executed
* Office Equipment	Partly executed
* Computers	Partly executed
* Furniture and Fittings	Partly executed
* Procurement of Office Equipment for Attorney-General's Office	RfQ issued

Procurement of Works in:	Status
--------------------------	--------

Component 1: ECG Financial And Operational Turnaround (EFOT): Activity 1.3 –Reduction in Commercial Losses And Improvement of Revenue Collection Rates Activity- which include:

* Normalization of Customer Connections Sub-Activity	Yet to be undertaken
* Replacement of Legacy Meters with Prepayment Meters	Yet to be undertaken
* Installation of AMR meters at Critical Nodes	Yet to be undertaken

Component 1: ECG Financial And Operational Turnaround (EFOT): Activity 1.4 – Technical Losses Reduction - which include:

* Procurement of IDIQ Works Contractors for LV Implementation	Yet to be undertaken
* Deployment of Low Voltage Bifurcation at Dansoman District	Yet to be undertaken
* Deployment of Low Voltage Bifurcation at Achimota District	IFQ for IDIG to be launched
* Deployment of Low Voltage Bifurcation at Kaneshie District	IFQ for IDIG to be launched
* Deployment of Low Voltage Bifurcation at Teshie District	IFQ for IDIG to be launched
* Deployment of Low Voltage Bifurcation at Roman Ridge District	IFQ for IDIG to be launched
* Deployment of Low Voltage Bifurcation at Makola District	IFQ for IDIG to be launched
* Deployment of Low Voltage Bifurcation at Kwabenya District	IFQ for IDIG to be launched

MiDA General Procurement Notice No. 10

* Deployment of Low Voltage Bifurcation at Mampong District	IFQ for IDIG to be launched	Component 4: Access Project: Activity 4.1 – Improved Electricity Supply to MSMEs and Social Institutions - which include:	
* Deployment of Low Voltage Bifurcation at Dodowa District	IFQ for IDIG to be launched	* High Voltage Distribution System – Security Lighting Work Package 1 (First 4 Market & Economic Enclaves in Accra)	Yet to be undertaken
* Deployment of Low Voltage Bifurcation at Legon District	IFQ for IDIG to be launched	* High Voltage Distribution System – Security Lighting Work Package 2 (Second 3 Market & Economic Enclaves in Accra)	Yet to be undertaken
* Supply and Installation of the Pokuase Bulk Supply Point (BSP) Sub-Transmission Interconnecting Circuits	Yet to be undertaken	* High Voltage Distribution System – Security Lighting Work Package 3 (3 Market & Economic Enclaves in Tamale)	Yet to be undertaken
* Supply and Installation of the Primary Substations (Phase 1) (Korle-Gonno, Kobotobi, Kanda and Legon)	Yet to be undertaken	Component 6: Energy Efficiency & Demand Side Management Project: Activity 6.1 – Development And Enforcement of Standards & Labels - which include:	
* Supply and Installation of the Primary Substations Interconnecting Links (Phase 1)	Yet to be undertaken	* Procurement of AC Test Laboratory Contractor	Yet to be undertaken
* Procurement of the Works Contractor for the Fence Wall	RfQ issued	* Procurement of Additional Test Laboratories Contractor	Yet to be undertaken
Component 2: NEDCo Financial And Operational Turnaround (NEFOT): Activity 2.6 – Tamale Service Area Improvement Activity - which include:		* Procurement of AC Test Facility Containment Building	Yet to be undertaken
* Rehabilitation/Upgrade of Lines and Underground Cables	Yet to be undertaken	Component 6: Energy Efficiency & Demand Side Management Project: Activity 6.2 – Improved Energy Auditing - which include:	
* High Voltage Distribution System	Yet to be undertaken	* Procurement of Contractor for the Race to Retrofit and Renewables" Program – Phase 1 – Package 1 – Lighting Retrofits	IFB issued
* Primary Substations (Fuo and Lamashegu)	Yet to be undertaken	* Procurement of Contractor for the Race to Retrofit and Renewables" Program – Phase 1 – HVAC Retrofits (Air-conditioner, Refrigerator, Ceiling Fans)	Yet to be undertaken
* Medium Voltage Circuits from Primary Substations (Fuo and Lamashegu)	Yet to be undertaken	* Procurement of Contractor for the Race to Retrofit and Renewables" Program – Phase 1 – Real Time Energy Monitoring System (RTEMS)	Yet to be undertaken
* Islamic Feeder Conversion	Yet to be undertaken	* Procurement of Contractor for the Race to Retrofit and Renewables" Program – Phase 2 – Voltage Stabilizers at KBTH and Adabraka Polyclinic	Yet to be undertaken
* AMR Metering	Yet to be undertaken		
* Reactive Power Compensation	Yet to be undertaken		
Component 2: NEDCo Financial And Operational Turnaround (NEFOT): Activity 2.7 – Commercial Development Activity - which include:			
* AgDevCo Irrigation Scheme Connection	Yet to be undertaken

Vice President Inaugurates ECG PSP Conditions Precedent (CP) Committee

H.E. Dr. Mahamudu Bawumia
Vice President of Ghana

Tony Akoto Ampaw (Esq.),
Chairman, CP Committee

The Vice President, H. E. Dr. Mahamudu Bawumia on July 31 inaugurated the Conditions Precedent (CP) Committee at a brief Ceremony at the Jubilee House, Accra.

The Committee was tasked to work towards meeting some 45 Conditions prior to the handing over of the electricity distribution business of ECG to the Power Distribution Services (PDS) Limited.

GHANA POWER COMPACT OFFERS PRACTICAL INTERNSHIPS AND MENTORING OPPORTUNITIES FOR GIRLS IN STEM

The Ghana Power Compact Program is supporting the Global agenda to promote Girls education and interests in Science, Technology, Engineering and Mathematics (STEM). The Compact is doing this by facilitating internship placements and mentoring sessions for female students enrolled in STEM Programmes in tertiary and vocational institutions across Ghana.

The Millennium Development Authority (MiDA), the accountable entity mandated by the Government of Ghana to implement Ghana's Power Compact Program and its partner US Government Agency - Millennium Challenge Corporation (MCC) have, as a pilot, supported 50 female students enrolled in STEM Programs in six Tertiary and Vocational Institutions with practical internships to empower them with the skills needed to secure jobs in the Power Industry.

Working in partnership with some implementing entities in the Compact Programme, namely; Electricity Company of Ghana (ECG), Ghana Standards Authority and Energy Commission, the girls were engaged for a period of two months at the partner Institutions and were provided the opportunity to perform hands on tasks related to their area of Study.

There is growing global recognition of the benefits associated with increasing women's participation in both public and private industries. Indeed a "Women in Power and Utilities Index" notes that Power Companies with a higher number of women in decision making tend to have better financial performance. However, low girls' enrolment in STEM education, as is the case in Ghana, is one of the reasons for women's low employment and decision making roles in Power Utilities.

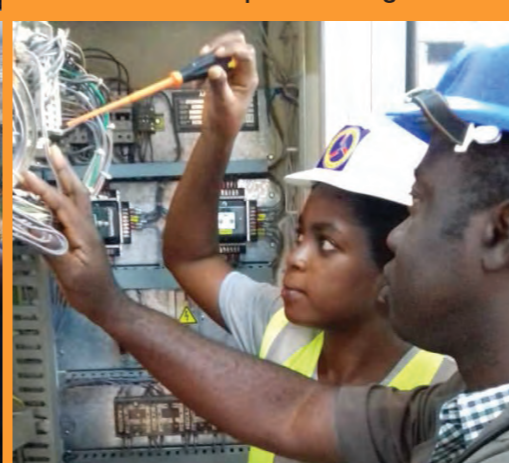

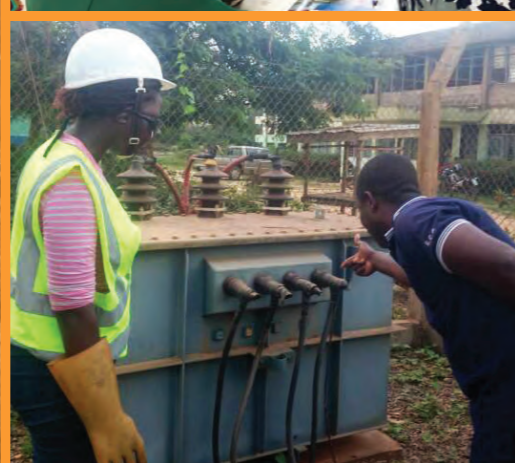

The Internship Program for female students is being driven by the Gender and Social Inclusion Unit at MiDA. A minimum of 300 interns, from 2018 to 2021, will be supported through this Program, which also includes group and individual mentoring sessions aimed at building their confidence and improving their coping skills to deal with the stereotypical negative attitudes about women in STEM.

Dr. Cherub Antwi-Nsiah, GSI Director, MiDA

Continuation from page 15

Component 6: Energy Efficiency & Demand Side Management Project: Activity 6.4 – Demand Side Management Infrastructure - which include:	
* Procurement of Contractor for the Street-lighting Replacement	Yet to be undertaken
Procurement of Consulting Services in:	
Component 1: ECG Financial And Operational Turn-around (EFOT): Activity 1.2 – Modernization Utility Operations - which include:	
* Consultancy for PMC Supervision (Supervision of Works)	Yet to be undertaken
Component 2: NEDCO Financial and Operational Turn-around Project (NEFOT): Activity 2.2 – Modernization Utility Operations - which include:	
* Consultancy for Customer Census	Yet to be undertaken
* Services of an Individual Design Consultant for the Installation of CIS System and integration with AMR and Pre-pay Metering Systems	Yet to be undertaken
Component 3: Regulatory Strengthening & Capacity Building Project: Activity 3.1 - Sector Performance Monitoring Capacity Building - which include:	
* Consultancy Services for Capacity Building in Respect of CAPSCAN Outcome	Yet to be undertaken
Component 4: Access Project: Activity 4.2 – Institutional Partnership and Collaboration - which include:	
* Consultancy Services for Customer Outreach, Facilitation of New Connections and Normalization of Services	Yet to be undertaken
* Consultancy Services for Institutional Assessment and Engagement for Sustainability	Yet to be undertaken
Component 6: Energy Efficiency and Demand Side Management Project: Activity 6.1 – Development and Enforcement of Standards & Labels Activity - which include:	
* Procurement of Consultancy Services to draft Legislative Instruments (LIs)	RfP issued

Component 6: Energy Efficiency and Demand Side Management Project: Activity 6.2 - Improved Energy Auditing - which include:	
* Consultancy Services for the setting-up of two Training Centers for Energy Auditors	Evaluation stage
Component 8: Programme Administration & Oversight: Activity 8.1 - MiDA Administration - which include:	
* Procurement of Technical Advisory Services to support the Attorney-General's Office	Yet to be undertaken
Procurement of IT Services in:	
Component 1: ECG Financial and Operational Turn-around Project: Activity 1.2 - Modernization Utility Operations - which include:	
* Services of a Supplier for the Upgrade of ECG Data Center & Communication Network	IFB issued
* Services of a Supplier for the Enterprise Resource Planning (ERP) Implementation	Yet to be undertaken
Component 1: ECG Financial And Operational Turn-around (EFOT): Activity 1.5 – Outage Reduction Activity - which include:	
* Services of a Supplier for the Outage Management System (OMS) Implementation	Yet to be undertaken
Procurement of Non-Consulting Services in:	
Component 8: Programme Administration & Oversight: Activity 8.1 - MiDA Administration - which include:	
* Erection and Rental of Billboards for MiDA Campaign	RfQ issued
